HISTORIA DE P. M. TAFER, S.A.

Fundado en 1971

En 1971, los hermanos Fernández Martín comienzan su actividad empresarial en la localidad malagueña de Alhaurín el Grande bajo el nombre de Talleres Fernández, elaborando, en el seno de una empresa familiar, la actividad de cerrajería artística y carpintería metálica de una forma artesanal.

En 1976, los hermanos Fernández incorporan la línea de fabricación de Tubos Ornamentales, convirtiéndose en pioneros en este mercado en largos de 6 metros, fabricando, bajo sus propias patentes, una amplia gama de formas ornamentales, longitudes y diámetros que han situado a Prefabricados Metálicos Tafer, S.A. En las mejores posiciones, no sólo en el mercado nacional sino también con una acusada presencia internacional y reconocida fama.

El rápido crecimiento de la empresa la hace situarse como punta de lanza y referente en el mercado, y así, en el año 1984 queda registrada como sociedad anónima con su nombre actual: Prefabricados Metálicos Tafer, S.A., para posteriormente registrar la marca de forma internacional en 1987.

La expansión conlleva que en el año 1992 se incorpore a la gama de productos la fabricación de forja artística así como la comercialización de productos de fundición decorativa y hierros en general, obteniendo el reconocimiento de un número creciente de clientes y colaboradores

Aunque los productos de Prefabricados Metálicos Tafer, S.A. siempre han seguido estándares de calidad; en el año 2000, la empresa obtiene el Certificado de Sistema de Aseguramiento de la Calidad UNE EN ISO 9001:2008, distinción que enorgullece a todos los miembros de la empresa.

En el año 2017 la empresa inaugura nueva fábricas trasladando todas sus sedes al Polígono Industrial La Rosa de Alhaurin el Grande donde unifica sus procesos productivos bajo un sistema industrializado que unido al constante desarrollo del departamento de I+D, permite no solo controlar la calidad de los productos fabricados sino también ofrecer productos exclusivos y competitivos tales como: tubos ornamentales de aluminio, tubos ornamentales redondos con extremos cuadrados, tubos conificados... y se encuentra a disposición del cliente para ejecutar sus propios diseños y materializar las ideas en hierro.

Tradición, calidad y buen servicio viene ofreciendo Prefabricados Metálicos Tafer, S.A. desde 1971. Gracias por estar a nuestro lado todo estos años.

In 1971, the Fernández Martin brothers began their business activity in the Malaga village of Alhaurín el Grande under the name of Talleres Fernández, developing, within a family business, the activity of artistic locks and metalwork in a traditional way offering handcrafted products.

In 1976, the Fernández brothers incorporated the Ornamental Pipes manufacturing line, becoming pioneers in this market in lengths of 6 meters, manufacturing, under their own patents, a wide range of ornamental shapes, lengths and diameters that have placed Prefabricated Metals Tafer, SA In the best positions, not only in the national market but also with a well-known international presence and recognized reputation.

The rapid growth of the company makes it stand as a spearhead and benchmark in the market, and thus, in 1984 it is registered as a public limited company under its current name: Prefabricados Metálicos Tafer, SA, to subsequently register the brand, logo and company name internationally in 1987 under its actual appearance.

The expansion implies that in 1992 the manufacture of Artistic Wrought Iron (forging) as well as the commercialization of Decorative Cast Iron and iron products in general were added to the product range, obtaining on that way, the recognition of an increasing number of clients and collaborators.

Although the products of Prefabricados Metálicos Tafer, S.A. have always followed quality standards, in 2000, the company obtained the UNE EN ISO 9001:2008 Quality Assurance System Certificate, a distinction that makes all the members of the company really proud of.

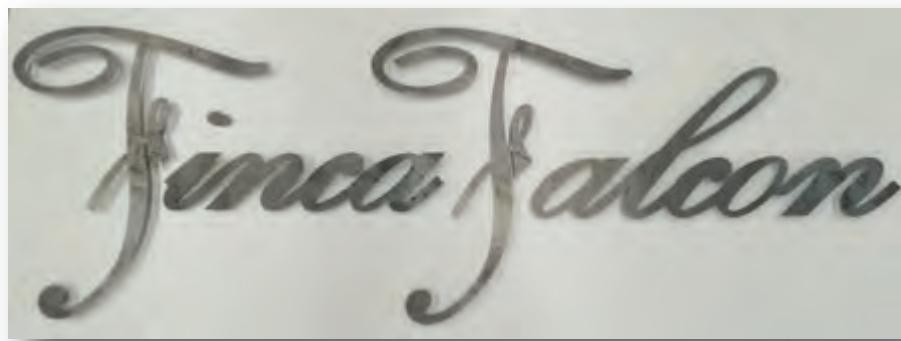

In 2018, the company moved all its headquarters to the La Rosa Industrial Place in Alhaurin el Grande where has been unified all its production processes under an industrialized system that together with the constant development of the R&D department, allows not only to control the quality of the products manufactured but also to offer exclusive and competitive products such as: ornamental aluminum tubes, round ornamental tubes with square endings, tapered tubes ... and provide the chance to clients to execute their own designs and materialize their ideas in iron.

Tradition, quality and good service has been offering Prefabricados Metálicos Tafer, S.A. since 1971. Thanks for being by our side all these years.
